# Release Notes

## Acc-lite

Version 3.0.0

July 15, 2010

The information contained in this document has been carefully researched and is, to the best of our knowledge, accurate. However, Data Display assumes no liability for any product failures or damages, immediate or consequential, resulting from the use of the information provided herein. Data Display products are not intended for use in systems in which failures of product could result in personal injury. All trademarks mentioned herein are property of their respective owners. All specifications are subject to change without notice.

## ***1. New features, changes, bug fixes***

### **Version 3.0.0**

-----

- This is the initial release

o Supports DigiPoster and VideoPoster device types

## ***2. Revision History***

- no revision history

### **3. *Known Issues***

- Video codecs for playing ArtistaMEDIA video formats are not a part of Acc-lite. Please install them separately. One way to install them is to install *ffshow* and enable 'MPEG in AVI' video container (choose either libmpeg or libav codec).

#### **4. Versioning schema**

Each Acc-lite release receives a unique numerical identifier, expressed as three numbers separated by periods. Structure used for these numbers is:

*major.minor.revision*

*Major* release number is increased when there are significant jumps in functionality, the *minor* number is incremented when only minor features or significant fixes have been implemented, and the *revision* number is incremented when minor bugs are fixed.

Odd minor version numbers are used to denote development releases, and even minor version numbers are used to denote stable releases.
